

RESILIENT AND READY

2025 QUARTERLY REVIEW **FIRST QUARTER**

CN Announces First Quarter Results

Railroad Delivers Q1 Diluted EPS of C\$1.85, an 8% increase

MONTREAL, May 1, 2025 – CN (TSX: CNR) (NYSE: CNI) today reported its financial and operating results for the first quarter ended March 31, 2025.

“Our team delivered a strong performance this quarter through tight cost control and disciplined adherence to our plan, mitigating the impact of winter conditions. In the context of a volatile macroeconomic and geopolitical environment, we will remain focused on agility and customer collaboration. We are committed to continue driving operational and service excellence across our network in 2025 to deliver for our customers and shareholders.”

– Tracy Robinson, President and Chief Executive Officer, CN

Quarterly highlights

- Revenue ton miles (RTMs) increased 1% to 60,049 (millions).
- Revenues of C\$4,403 million, an increase of C\$154 million, or 4%.
- Operating income of C\$1,610 million, an increase of \$64 million, or 4%.
- Operating ratio, defined as operating expenses as a percentage of revenues, of 63.4%, an improvement of 0.2 points.
- Diluted earnings per share (EPS) of C\$1.85, an increase of 8%.

2025 guidance and 2024-2026 financial outlook ⁽¹⁾⁽²⁾

In 2025, CN continues to expect to deliver adjusted diluted EPS growth of 10%-15% and plans to invest approximately C\$3.4 billion in its capital program, net of amounts reimbursed by customers.

Over the 2024-2026 period, CN continues to target compounded annual adjusted diluted EPS growth in the high single-digit range.

While CN's 2025 guidance and 2024-2026 financial outlook remain unchanged, the Company notes there is a heightened recessionary risk related to tariffs and trade actions taken by various countries.

CONFERENCE CALL DETAILS

CN's senior officers will review the results and the railway's outlook in a conference call starting at 4:30 p.m. Eastern Time on May 1. Tracy Robinson, CN President and Chief Executive Officer, will lead the call. Parties wishing to participate via telephone may dial 1-800-715-9871 (Canada/U.S.), or 1-647-932-3411 (International), using 3839820 as the passcode. Participants are advised to dial in 10 minutes prior to the call.

(1) Non-GAAP Measures

CN's outlook, guidance, or targets ⁽²⁾ exclude certain adjustments, which are expected to be comparable to adjustments made in prior years. However, management cannot individually quantify on a forward-looking basis the impact of these adjustments, which could be significant, are difficult to predict and may be highly variable. As a result, CN does not provide a corresponding GAAP measure for, or reconciliation to, its outlook, guidance or targets.

(2) Forward-Looking Statements

Certain statements included in this news release constitute "forward-looking statements" within the meaning of the *United States Private Securities Litigation Reform Act of 1995* and under Canadian securities laws, including statements based on management's assessment and assumptions and publicly available information with respect to CN. By their nature, forward-looking statements involve risks, uncertainties and assumptions. CN cautions that its assumptions may not materialize and that current economic conditions render such assumptions, although reasonable at the time they were made, subject to greater uncertainty. Forward-looking statements may be identified by the use of terminology such as "believes," "expects," "anticipates," "assumes," "outlook," "plans," "targets", or other similar words.

2025 key assumptions

CN has made a number of economic and market assumptions in preparing its 2025 outlook. The Company now assumes slightly positive growth in North American industrial production in 2025 (compared to its January 30, 2025 assumption of approximately 1%). For the 2024/2025 crop year, the grain crop in Canada was in line with its five-year average and the U.S. grain crop was above its five-year average. The Company continues to assume that the 2025/2026 grain crop in Canada will be in line with its five-year average and now assumes that the U.S. grain crop will be above its five-year average (compared to its January 30, 2025 assumption that the 2025/2026 grain crop in the U.S. will be in line with its five-year average). CN continues to assume RTM growth will be in the low to mid single-digit range. CN also continues to assume that in 2025, the value of the Canadian dollar in U.S. currency will be approximately \$0.70, and now assumes that in 2025 the average price of crude oil (West Texas Intermediate) will be in the range of US\$60 - US\$70 per barrel (compared to its January 30, 2025 assumption of being in the range of US\$70 - US\$80 per barrel).

2024-2026 key assumptions

CN has made a number of economic and market assumptions in preparing its three-year financial perspective. CN continues to assume that the North American industrial production will increase by approximately 1% CAGR over the 2024 to 2026 period. CN continues to assume pricing above rail inflation. CN continues to assume that the value of the Canadian dollar in U.S. currency will be approximately \$0.70 and that the average price of crude oil (West Texas Intermediate) will be in the range of US\$70 - US\$80 per barrel during this period.

The Company notes there is a heightened recessionary risk related to tariffs and trade actions taken by various countries. Should the recessionary risk materialize, demand for freight transportation would be negatively impacted.

Forward-looking statements are not guarantees of future performance and involve risks, uncertainties and other factors which may cause actual results, performance or achievements of CN to be materially different from the outlook or any future results, performance or achievements implied by such statements. Accordingly, readers are advised not to place undue reliance on forward-looking statements. Important risk factors that could affect the forward-looking statements in this news release include, but are not limited to, general economic and business conditions, including factors impacting global supply chains such as pandemics and geopolitical conflicts and tensions; trade restrictions, trade barriers, or the imposition of tariffs or other changes to international trade arrangements; industry competition; inflation, currency and interest rate fluctuations; changes in fuel prices; legislative and/or regulatory developments; compliance with environmental laws and regulations; actions by regulators; increases in maintenance and operating costs; security threats; reliance on technology and related cybersecurity risk; transportation of hazardous materials; various events which could disrupt operations, including illegal blockades of rail networks, and natural events such as severe weather, droughts, fires, floods and earthquakes; climate change; labor negotiations and disruptions; environmental claims; uncertainties of investigations, proceedings and other types of claims and litigation; risks and liabilities arising from derailments; timing and completion of capital programs; the availability of and cost competitiveness of renewable fuels and the development of new locomotive propulsion technology; reputational risks; supplier concentration; pension funding requirements and volatility; and other risks detailed from time to time in reports filed by CN with securities regulators in Canada and the United States. Reference should also be made to Management's Discussion and Analysis (MD&A) in CN's annual and interim reports, Annual Information Form and Form 40-F, filed with Canadian and U.S. securities regulators and available on CN's website, for a description of major risk factors relating to CN.

The achievement of CN's climate goals is subject to several risks and uncertainties, including those disclosed in the MD&A in CN's annual and interim reports. While the Company currently believes its goals are reasonably achievable, there can be no certainty that the Company will achieve any or all of these goals within the stated timeframe, or that achieving any of these goals will meet all of the expectations of its stakeholders or applicable legal requirements.

Forward-looking statements reflect information as of the date on which they are made. CN assumes no obligation to update or revise forward-looking statements to reflect future events, changes in circumstances, or changes in beliefs, unless required by applicable securities laws. In the event CN does update any forward-looking statement, no inference should be made that CN will make additional updates with respect to that statement, related matters, or any other forward-looking statement. Information contained on, or accessible through, our website is not incorporated by reference into this news release.

This earnings news release, as well as additional information, including the Financial Statements, Notes thereto and MD&A, is contained in CN's Quarterly Review available on the Company's website at www.cn.ca/financial-results and on SEDAR+ at www.sedarplus.ca as well as on the U.S. Securities and Exchange Commission's website at www.sec.gov through EDGAR.

About CN

CN powers the economy by safely transporting more than 300 million tons of natural resources, manufactured products, and finished goods throughout North America every year for its customers. With its nearly 20,000-mile rail network and related transportation services, CN connects Canada's Eastern and Western coasts with the U.S. Midwest and the U.S. Gulf Coast, contributing to sustainable trade and the prosperity of the communities in which it operates since 1919.

(1) This non-GAAP measure does not have any standardized meaning prescribed by GAAP and therefore, may not be comparable to similar measures presented by other companies. See the supplementary schedule entitled *Non-GAAP Measures – Constant currency* for an explanation of this non-GAAP measure.

(2) Amounts expressed in Canadian dollars.

(3) Statistical operating data and related key operating measures are unaudited and based on estimated data available at such time and are subject to change as more complete information becomes available.

NON-GAAP MEASURES – UNAUDITED

In this supplementary schedule, the "Company" or "CN" refers to Canadian National Railway Company, together with its wholly-owned subsidiaries. Financial information included in this schedule is expressed in Canadian dollars, unless otherwise noted.

CN reports its financial results in accordance with United States generally accepted accounting principles (GAAP). The Company also uses non-GAAP measures that do not have any standardized meaning prescribed by GAAP, including adjusted performance measures, free cash flow, constant currency and adjusted debt-to-adjusted EBITDA multiple. These non-GAAP measures may not be comparable to similar measures presented by other companies. From management's perspective, these non-GAAP measures are useful measures of performance and provide investors with supplementary information to assess the Company's results of operations and liquidity. These non-GAAP measures should not be considered in isolation or as a substitute for financial measures prepared in accordance with GAAP.

The Company did not present any adjusted performance measures (adjusted net income, adjusted diluted earnings per share, adjusted operating income, adjusted operating expenses and adjusted operating ratio) as there were no adjustments in the first quarter of 2025 and 2024.

Free cash flow

Free cash flow is a useful measure of liquidity as it demonstrates the Company's ability to generate cash for debt obligations and for discretionary uses such as payment of dividends, share repurchases, and strategic opportunities. The Company defines its free cash flow measure as the difference between net cash provided by operating activities and net cash used in investing activities, adjusted for the impact of (i) business acquisitions and combinations (ii) merger transaction-related payments, cash receipts and cash income taxes, which are items that are not indicative of operating trends. Free cash flow does not have any standardized meaning prescribed by GAAP and therefore, may not be comparable to similar measures presented by other companies.

The following table provides a reconciliation of Net cash provided by operating activities in accordance with GAAP, as reported for the three months ended March 31, 2025 and 2024, to the non-GAAP free cash flow presented herein:

<i>In millions</i>	Three months ended March 31			
	2025		2024	
Net cash provided by operating activities	\$	1,164	\$	1,117
Net cash used in investing activities		(538)		(588)
Free cash flow	\$	626	\$	529

NON-GAAP MEASURES – UNAUDITED

Constant currency

Financial results at constant currency allow results to be viewed without the impact of fluctuations in foreign currency exchange rates, thereby facilitating period-to-period comparisons in the analysis of trends in business performance. Measures at constant currency are considered non-GAAP measures and do not have any standardized meaning prescribed by GAAP and therefore, may not be comparable to similar measures presented by other companies. Financial results at constant currency are obtained by translating the current period results denominated in US dollars at the weighted average foreign exchange rates used to translate transactions denominated in US dollars of the comparable period of the prior year.

The average foreign exchange rates were \$1.435 and \$1.349 per US\$1.00 for the three months ended March 31, 2025 and 2024 respectively. On a constant currency basis, the Company's net income for the three months ended March 31, 2025 would have been lower by \$34 million (\$0.05 per diluted share).

The following table provides a reconciliation of the impact of constant currency and related percentage change at constant currency on the financial results, as reported for the three months ended March 31, 2025:

	Three months ended March 31

Diluted earnings per share	\$ 1.85	\$ (0.05)	\$ 1.72	5%

NON-GAAP MEASURES – UNAUDITED

Adjusted debt-to-adjusted EBITDA multiple

Management believes that the adjusted debt-to-adjusted EBITDA multiple is a useful credit measure because it reflects the Company's ability to service its debt and other long-term obligations. The Company calculates the adjusted debt-to-adjusted EBITDA multiple as adjusted debt divided by the last twelve months of adjusted EBITDA. Adjusted debt is defined as the sum of Long-term debt and Current portion of long-term debt as reported on the Company's Consolidated Balance Sheets as well as Operating lease liabilities, including current portion and pension plans in deficiency recognized on the Company's Consolidated Balance Sheets due to the debt-like nature of their contractual and financial obligations. Adjusted EBITDA is calculated as Net income excluding Interest expense, Income tax expense, Depreciation and amortization, operating lease cost, Other components of net periodic benefit income, Other income (loss), and other significant items that are not reflective of CN's underlying business operations and which could distort the analysis of trends in business performance. Adjusted debt and adjusted EBITDA are non-GAAP measures used to compute the adjusted debt-to-adjusted EBITDA multiple. These measures do not have any standardized meaning prescribed by GAAP and therefore, may not be comparable to similar measures presented by other companies.

The following table provides a reconciliation of debt and Net income in accordance with GAAP, reported as at and for the twelve months ended March 31, 2025 and 2024, to the adjusted measures presented herein, which have been used to calculate the non-GAAP adjusted debt-to-adjusted EBITDA multiple:

<i>In millions, unless otherwise indicated</i>	<i>As at and for the twelve months ended March 31,</i>		2025	2024
Debt	\$	20,792	\$	19,761
Adjustments:				
Operating lease liabilities, including current portion ⁽¹⁾		466		387
Pension plans in deficiency ⁽²⁾		348		360
Adjusted debt	\$	21,606	\$	20,508
Net income	\$	4,506	\$	5,508
Interest expense		914		767
Income tax expense		1,422		814
Depreciation and amortization		1,923		1,831
Operating lease cost ⁽³⁾		155		151
Other components of net periodic benefit income		(466)		(473)
Other income		(65)		(135)
Adjustment:				
Loss on assets held for sale ⁽⁴⁾		78		—
Adjusted EBITDA	\$	8,467	\$	8,463
Adjusted debt-to-adjusted EBITDA multiple (times)		2.55		2.42

(1) Represents the present value of operating lease payments.

(2) Represents the total funded deficit of all defined benefit pension plans with a projected benefit obligation in excess of plan assets.

(3) Represents the operating lease costs recorded in Purchased services and material and Equipment rents within the Consolidated Statements of Income.

(4) Relates to a loss on assets held for sale of \$78 million recorded in the second quarter of 2024, resulting from an agreement to transfer the ownership and related risks and obligations of the Quebec Bridge located in Quebec, Canada, to the Government of Canada. See the section entitled *2024 Highlights – Assets held for sale* of the Company's 2024 Annual MD&A for additional information.

See accompanying notes to Interim Consolidated Financial Statements.

1 – Basis of presentation

In these notes, the "Company" or "CN" refers to Canadian National Railway Company, together with its wholly-owned subsidiaries. The accompanying unaudited Interim Consolidated Financial Statements ("Interim Consolidated Financial Statements"), expressed in Canadian dollars, have been prepared in accordance with United States generally accepted accounting principles (GAAP) for interim financial statements. Accordingly, they do not include all of the disclosures required by GAAP for complete financial statements. In management's opinion, all adjustments (consisting of normal recurring accruals) considered necessary for fair presentation have been included. Interim operating results are not necessarily indicative of the results that may be expected for the full year.

These Interim Consolidated Financial Statements have been prepared using accounting policies consistent with those used in preparing CN's 2024 Annual Consolidated Financial Statements and should be read in conjunction with such statements and Notes thereto.

2 – Recent accounting pronouncements

The following recent Accounting Standards Updates (ASU) issued by the Financial Accounting Standards Board (FASB) have an effective date after December 31, 2024 and have not been adopted by the Company:

ASU 2024-03 – Disaggregation of Income Statement Expenses (Subtopic 220-40)

This ASU aims to provide stakeholders a clearer understanding of an entity's expenses and enhance their ability to assess performance, forecast expenses and evaluate the entity's potential for future cash flows. The ASU amends the rules on income statement expense disclosures and requires public business entities to disaggregate and disclose, in tabular format in the notes to financial statements, specified categories of expenses contained within certain income statement expense line items; to integrate certain amounts that were already required to be disclosed under current GAAP with the new disaggregation requirements and to qualitatively disclose descriptions of the amounts remaining that were not separately disaggregated. The ASU also requires public business entities to disclose the total amount of selling expenses and, in annual reporting periods, an entity's definition of those selling expenses. This ASU does not change or remove the current disclosure requirements of expense line items on the face of the Consolidated Statements of Income.

The amendments in this ASU are effective for annual reporting periods beginning after December 15, 2026, and interim reporting periods beginning after December 15, 2027. Early adoption is permitted. The amendments in this ASU should be applied either prospectively to Consolidated Financial Statements issued for reporting periods following the effective date, or retrospectively to any or all prior periods presented in the Consolidated Financial Statements.

The Company is evaluating the effects that the adoption of the ASU will have on its Consolidated Financial Statements disclosures.

ASU 2023-09 Income Taxes (Topic 740): Improvements to income tax disclosures

The ASU amends the rules on income tax disclosures by modifying or eliminating certain existing income tax disclosure requirements in addition to establishing new requirements. The amendments address investor requests for more transparency about income taxes, including jurisdictional information, by requiring consistent categories and greater disaggregation of information. The ASU's two primary amendments relate to the rate reconciliation and income taxes paid annual disclosures.

Reconciling items presented in the rate reconciliation will be in dollar amounts and percentages, and will be disaggregated into specified categories with certain reconciling items further broken out by nature and/or jurisdiction using a 5% threshold of domestic federal taxes. Income taxes paid will be disaggregated between federal, provincial/territorial, and foreign taxing jurisdictions using a 5% threshold of total income taxes paid net of refunds received.

The ASU is effective for annual periods beginning after December 15, 2024.

The adoption of the ASU will have an impact on the Company's Consolidated Financial Statements disclosures. The required disclosure changes will be reflected in the Company's Consolidated Financial Statements when the ASU is adopted. As the Company will not early adopt the ASU, the required disclosure changes will be reflected in the Company's 2025 Annual Consolidated Financial Statements. The Company is currently evaluating whether to apply the amendments prospectively or retrospectively.

NOTES TO INTERIM CONSOLIDATED FINANCIAL STATEMENTS - UNAUDITED

Other recently issued ASUs required to be applied on or after March 31, 2025 have been evaluated by the Company and are not expected to have a significant impact on the Company's Consolidated Financial Statements.

3 – Acquisition

On January 14, 2025, the Surface Transportation Board (STB) issued a final decision approving CN's application to acquire control of the Iowa Northern Railway Company (IANR), subject to certain conditions. The Company assumed control of IANR on March 1, 2025 (Control Date) and began consolidating IANR on that date, accounting for the acquisition as a business combination achieved in stages. The Company derecognized its previously held equity method investment in IANR of \$320 million as of March 1, 2025 and remeasured the investment at its Control Date fair value of \$344 million resulting in a net remeasurement gain of \$24 million recorded in Other income in the Consolidated Statements of Income. The fair value of the previously held equity interest in IANR was determined through use of a discounted cash flow approach, which incorporated the Company's best estimates of various assumptions including, but not limited to, discount rates and terminal growth rates and multiples.

The Company's Consolidated Balance Sheet includes the assets and liabilities of IANR as of the Control Date, and since that time, IANR's results of operations have been included in the Company's results of operations. The Company has not provided pro forma information relating to the pre-control date period as the acquisition was not material.

The following table summarizes the preliminary purchase price allocation with the fair value at the Control Date of the previously held equity interest in IANR, as well as the amounts recognized for the identifiable assets acquired and liabilities assumed on the Control Date:

<i>(in millions)</i>	March 1, 2025	
Consideration		
Fair value of previously held equity method investment ⁽¹⁾	\$	344
Recognized amounts of identifiable assets acquired and liabilities assumed ⁽¹⁾		
Current assets	\$	10
Properties		425
Other non-current assets		12
Current liabilities		(20)
Deferred income tax liabilities		(93)
Other non-current liabilities		(23)
Total identifiable net assets ⁽²⁾	\$	311
Goodwill ⁽³⁾	\$	33

(1) The Company's fair value of the previously held equity interest in IANR and the related purchase price allocation is preliminary based on information available to the Company to date and subject to change over the measurement period, which may be up to one year from the Control Date.

(2) Includes operating lease right-of-use assets and liabilities. There were no identifiable intangible assets.

(3) The goodwill acquired through the business combination is mainly attributable to the premium of an established business operation. The goodwill is not deductible for tax purposes.

The preliminary fair values of Properties were determined using valuation techniques including the market approach and the cost approach. The significant assumptions used to determine the preliminary fair value of Properties were mostly related to a selection of comparable assets and inflation.

NOTES TO INTERIM CONSOLIDATED FINANCIAL STATEMENTS - UNAUDITED

4 – Revenues

<i>In millions</i>	Three months ended March 31

NOTES TO INTERIM CONSOLIDATED FINANCIAL STATEMENTS - UNAUDITED

Pension contributions

Pension contributions for all plans for the three months ended March 31, 2025 and 2024 were \$20 million and \$15 million, respectively. During the first quarter of 2025, one of CN's Canadian defined contribution pension plans was merged into the CN Pension Plan, and did not result in a remeasurement of the funded status of that plan. Based on the results of the Company's actuarial valuations for funding purposes as at December 31, 2023, the CN Pension Plan remained fully funded and at a level such that the Company continues to be prohibited from making contributions to the defined benefit component of the CN Pension Plan. Given the solvency ratio of certain Canadian registered defined benefit pension plans is above a specified threshold as at the last filed actuarial valuation, their next actuarial valuation for funding purposes would be required as at December 31, 2026, to be performed in 2027, although the valuation may be conducted earlier at the Company's discretion for those plans. Based on the anticipated results of these valuations, the CN Pension Plan is expected to remain fully funded and at a level such that the Company would continue to be prohibited from making contributions to the defined benefit component of the CN Pension Plan in 2025. As such, total cash contributions of approximately \$80 million are expected to be made in 2025 for all pension plans other than the defined benefit component of the CN Pension Plan.

6 – Earnings per share

7 – Financing activities

For details on the Company's available financing sources, see *Note 15 – Debt* to the Company's 2024 Annual Consolidated Financial Statements. For the three months ended March 31, 2025, the following changes occurred:

Revolving credit facilities

On March 28, 2025, the Company's revolving credit facility agreements were amended to extend their respective tenors by one additional year each. The unsecured credit facility of \$2.5 billion consists of two tranches of \$1.25 billion and are now maturing on March 31, 2028 and March 31, 2030, respectively. The unsecured credit facility of \$1.0 billion is now maturing on March 17, 2027. The credit facilities provide borrowings at various benchmark interest rates, such as the Secured Overnight Financing Rate (SOFR) and the Canadian Overnight Repo Rate Average (CORRA), plus applicable margins, based on CN's credit ratings. Both revolving credit facility agreements have one financial covenant, which limits debt as a percentage of total capitalization. The Company is in compliance as at March 31, 2025.

As at March 31, 2025 and December 31, 2024, the Company had no outstanding borrowings under these revolving credit facilities and there were no draws during the three months ended March 31, 2025.

Equipment loans

Borrowings under the non-revolving term loan facilities are provided at SOFR or CORRA plus applicable margins.

During the first three months of 2025, the Company repaid \$23 million of its equipment loans. As at March 31, 2025 and December 31, 2024, the Company had outstanding borrowings of \$1,426 million and \$1,449 million, respectively, at a weighted-average interest rate of 4.42% and 4.79%, respectively, and had no further amounts available to be drawn under these facilities.

NOTES TO INTERIM CONSOLIDATED FINANCIAL STATEMENTS - UNAUDITED

Commercial paper

As at March 31, 2025 and December 31, 2024, the Company had total commercial paper borrowings of US\$438 million (\$630 million) and US\$501 million (\$721 million), respectively, at a weighted-average interest rate of 4.45% and 4.73%, respectively, presented in Current portion of long-term debt on the Consolidated Balance Sheets.

Accounts receivable securitization program

On March 28, 2025, the Company extended the term of its agreement by one year to February 2, 2027. As at March 31, 2025 and December 31, 2024, the Company had no outstanding borrowings under the accounts receivable securitization program.

Bilateral letter of credit facilities

On March 28, 2025, the Company extended the maturity date of its committed bilateral letter of credit facility agreements to April 28, 2028.

As at March 31, 2025, the Company had outstanding letters of credit of \$326 million (\$329 million as at December 31, 2024) under the committed facilities and \$142 million (\$142 million as at December 31, 2024) under the uncommitted facilities.

Repurchase of common shares

The Company may repurchase its common shares pursuant to a Normal Course Issuer Bid (NCIB) at prevailing market prices plus brokerage fees, or such other prices as may be permitted by the Toronto Stock Exchange. Under its current NCIB, the Company may repurchase up to 20.0 million common shares between February 4, 2025 and February 3, 2026. As at March 31, 2025, the Company had not repurchased any common shares under its current NCIB.

During the first quarter of 2025, the Company paid \$51 million to the Canadian tax authorities related to the two percent tax on net shares repurchased during the year ended December 31, 2024.

The Company repurchased 13.9 million common shares under its previous NCIB, including 0.6 million common shares in the first quarter of 2025, which allowed for the repurchase of up to 32.0 million common shares between February 1, 2024 and January 31, 2025.

<i>In millions, except per share data</i>	Three months ended March 31

(1) Performance share unit (PSU) awards and restricted share unit (RSU) awards are granted under the Share Units Plan. PSU-ROIC awards and PSU-TSR awards settle depending on the level of attainment of a target return on invested capital (ROIC) performance condition, and on the level of attainment of a target total shareholder return (TSR) market condition, respectively, as defined by the award agreement, over the plan period of three years. RSU awards settle depending on continued employment throughout the plan period, and are not subject to market or performance conditions.

(2) Deferred share unit (DSU) awards are granted under the Voluntary Incentive Deferral Plan.

Share Units Plan

Granted ⁽⁴⁾	0.3	\$ 143.84	0.1	\$ 186.32	0.3	\$ 143.96
Settled ⁽⁵⁾	—	\$ —	(0.1)	\$ 179.03	—	\$ —
Forfeited	—	\$ 98.91	—	\$ 182.36	—	\$ 142.10
Outstanding at March 31, 2025	0.7	\$ 130.93	0.4	\$ 191.69	0.5	\$ 148.02

(1) The grant date fair value of equity settled PSU-ROIC awards granted in 2025 of \$34 million is valued based on the closing share price of the Company's stock on the date of the grant. As at March 31, 2025, total unrecognized compensation cost related to all outstanding awards was \$30 million and is expected to be recognized over a weighted-average period of 2.6 years.

(2) The grant date fair value of equity settled PSU-TSR awards granted in 2025 of \$28 million is calculated using a Monte Carlo simulation model. As at March 31, 2025, total unrecognized compensation cost related to all outstanding awards was \$43 million and is expected to be recognized over a weighted-average period of 2.3 years.

(3) The grant date fair value of equity settled RSU awards granted in 2025 of \$50 million is valued based on the closing share price of the Company's stock on the date of the grant. As at March 31, 2025, total unrecognized compensation cost related to all outstanding awards was \$54 million and is expected to be recognized over a weighted-average period of 2.1 years.

(4) Units granted in lieu of dividends have not been quantified as they relate to a nominal amount of units.

(5) Equity settled PSU-TSR awards granted in 2022 attained a performance vesting factor of 50%. In the first quarter of 2025, these awards were settled, net of the remittance of the participants' withholding tax obligation of \$4 million, by way of disbursement from the Share Trusts of a nominal number of common shares.

(1) The Company releases stranded tax effects from Accumulated other comprehensive loss to Net income upon the liquidation or termination of the related item.

(2) Foreign exchange gain (loss) on translation of net investment in foreign operations.

(3) Foreign exchange gain (loss) on translation of US dollar-denominated debt designated as a hedge of the net investment in foreign operations. The Company designates US dollar-denominated debt of the parent company as a foreign currency hedge of its net investment in foreign operations. Accordingly, from the dates of designation, foreign exchange gains and losses on translation of the Company's US dollar-denominated debt are recorded in Accumulated other comprehensive loss, which minimizes the volatility of earnings resulting from the conversion of US dollar-denominated debt into Canadian dollars.

(4) The cumulative changes in fair values of cross-currency interest rate swaps are included in Derivative instruments. See Note 11 – Financial instruments.

(5) Total before tax reclassified to Other components of net periodic benefit income in the Consolidated Statements of Income and included in net periodic benefit income. See Note 5 – Pensions and other postretirement benefits for additional information.

(6) Includes the amortization of treasury locks for the three months ended March 31, 2025 of \$1 million and the amortization of cross-currency interest rate swaps related to foreign currency exposure and interest expense. See Note 11 – Financial instruments.

10 – Major commitments and contingencies**Purchase commitments**

As at March 31, 2025, the Company had fixed and variable commitments to purchase rail, information technology services and licenses, locomotives, engineering services, rail ties, railroad cars, wheels, as well as other equipment and services with a total estimated cost of \$2,738 million. Costs of variable commitments were estimated using forecasted prices and volumes.

Contingencies

In the normal course of business, the Company becomes involved in various legal actions seeking compensatory and occasionally punitive damages, including actions brought on behalf of various purported classes of claimants and claims relating to employee and third-party personal injuries, occupational disease and property damage, arising out of harm to individuals or property allegedly caused by, but not limited to, derailments or other accidents.

As at March 31, 2025, the Company had aggregate reserves for personal injury and other claims of \$279 million, of which \$52 million was recorded as a current liability (\$284 million as at December 31, 2024, of which \$47 million was recorded as a current liability).

Although the Company considers such provisions to be adequate for all its outstanding and pending claims, the final outcome with respect to actions outstanding or pending as at March 31, 2025, or with respect to future claims, cannot be reasonably determined. When establishing provisions for contingent liabilities the Company considers, where a probable loss estimate cannot be made with reasonable certainty, a range of potential probable losses for each such matter, and records the amount it considers the most reasonable estimate within the range. However, when no amount within the range is a better estimate than any other amount, the minimum amount in the range is accrued. For matters where a loss is reasonably possible but not probable, a range of potential losses cannot be estimated due to various factors which may include the limited availability of facts, the lack of demand for specific damages and the fact that proceedings were at an early stage. Based on information currently available, the Company believes that the eventual outcome of the actions against the Company will not, individually or in the aggregate, have a material adverse effect on the Company's financial position. However, due to the inherent inability to predict with certainty unforeseeable future developments, there can be no assurance that the ultimate resolution of these actions will not have a material adverse effect on the Company's results of operations, financial position or liquidity.

Environmental matters

The Company's provision for specific environmental sites is undiscounted and includes costs for remediation and restoration of sites, as well as monitoring costs. Costs related to any unknown existing or future contamination will be accrued in the period in which they become probable and reasonably estimable. Additional information relating to the Company's environmental matters is provided in *Note 21 – Major commitments and contingencies* to the Company's 2024 Annual Consolidated Financial Statements.

Under the Comprehensive Environmental Response, Compensation and Liability Act of 1980 (CERCLA), the Company through one of its subsidiaries was notified by the U.S. Environmental Protection Agency (EPA) on February 28, 2024 that it is a potentially responsible party (PRP), along with at least five other previously notified parties, with respect to the Matthiessen & Hegeler Zinc Company Site (Site) in LaSalle, Illinois. EPA also requested that the Company respond to certain information requests, which the Company did on June 30, 2024. The Company's designation as a PRP is based on claims that the Company, or its predecessors, had land holdings historically that were leased to others for commercial or industrial uses that may allegedly have resulted in the disposal of hazardous substances onto the Site. Based on remedial investigations and feasibility studies previously conducted, the EPA issued a Record of Decision outlining the clean-up plan for the Site and certain off-Site areas. The Company has not accrued for any obligation related to the remediation of the Site as it has not been able to confirm to what, if any, extent it contributed to the contamination, the extent and cost of remediation and the contribution of other potentially responsible parties and their ability to pay for their obligations.

As at March 31, 2025, the Company had aggregate accruals for environmental costs of \$64 million, of which \$41 million was recorded as a current liability (\$56 million as at December 31, 2024, of which \$40 million was recorded as a current liability). The Company anticipates that the liability at March 31, 2025 will be paid out over the next five years. Based on the information currently available, the Company considers its accruals to be adequate.

Guarantees and indemnifications

A description of the Company's guarantees and indemnifications is provided in *Note 21 – Major commitments and contingencies* to the Company's 2024 Annual Consolidated Financial Statements.

As at March 31, 2025, the Company had outstanding letters of credit of \$326 million (\$329 million as at December 31, 2024) under the committed bilateral letter of credit facilities and \$142 million (\$142 million as at December 31, 2024) under the uncommitted bilateral letter of credit facilities, and surety and other bonds of \$140 million (\$145 million as at December 31, 2024), all issued by financial institutions with investment grade credit ratings to third parties to indemnify them in the event the Company does not perform its contractual obligations.

As at March 31, 2025, the maximum potential liability under these guarantee instruments was \$608 million (\$616 million as at December 31, 2024), of which \$571 million (\$571 million as at December 31, 2024) related to other employee benefit liabilities and workers' compensation and \$37 million (\$45 million as at December 31, 2024) related to other liabilities. The guarantee instruments expire at various dates between 2025 and 2026.

As at March 31, 2025, the Company had not recorded a liability with respect to guarantees and indemnifications as the Company did not expect to make any payments under its guarantees and indemnifications.

11 – Financial instruments

Derivative financial instruments

The Company uses derivative financial instruments from time to time in the management of its foreign currency and interest rate exposures. The Company has limited involvement with derivative financial instruments in the management of its risks and does not hold or issue them for trading or speculative purposes.

Foreign currency risk

Foreign exchange forward contracts

As at March 31, 2025, the Company had outstanding foreign exchange forward contracts to purchase a notional value of US\$438 million (US\$580 million as at December 31, 2024). These outstanding contracts are at a weighted-average exchange rate of \$1.43 per US\$1.00 (\$1.37 per US\$1.00 as at December 31, 2024). The weighted-average term of the contracts is 30 days (88 days as at December 31, 2024). Changes in fair values of foreign exchange forward contracts, resulting from changes in foreign exchange rates, are recognized in Other income in the Consolidated Statements of Income as they occur.

For the three months ended March 31, 2025 and 2024, the Company recorded gains of \$3 million and \$52 million, respectively, related to foreign exchange forward contracts. These gains were largely offset by the re-measurement of US dollar-denominated monetary assets and liabilities recorded in Other income.

As at March 31, 2025, the fair value of outstanding foreign exchange forward contracts included in Other current assets and Accounts payable and other was \$2 million and \$1 million, respectively (\$38 million and \$nil, respectively, as at December 31, 2024).

Cross-currency interest rate swaps

As at March 31, 2025, the aggregate notional amount of cross-currency interest rate swaps entered into was US\$975 million to hedge the US-to-Canadian dollar currency fluctuations on US dollar-denominated debts maturing on March 1, 2026 and July 15, 2028, for an aggregate principal amount of \$1,401 million with a weighted average fixed annual interest rate of 3.33%.

These cross-currency interest rate swaps were designated as qualifying hedging instruments and were accounted for as cash flow hedges, with their critical terms corresponding to the related US dollar-denominated debts.

NOTES TO INTERIM CONSOLIDATED FINANCIAL STATEMENTS - UNAUDITED

For the three months ended March 31, 2025, the cumulative changes in fair values of these cross-currency interest rate swaps recorded in Accumulated other comprehensive loss in derivative instruments resulted in a gain of \$1 million. For the three months ended March 31, 2025, the amounts amortized from Accumulated other comprehensive loss to Other income related to foreign currency exposure and Interest expense were gains of \$2 million and \$1 million, respectively, in the same period that the carrying values of the two US dollar-denominated debts were remeasured to Canadian dollars and the interest expense was recognized.

The cash flows related to these cross-currency interest rate swaps that pertain to the periodic interest settlements will be classified as operating activities and the cash flows that pertain to the principal balance will be classified as financing activities.

As at March 31, 2025, the fair value of outstanding cross-currency interest rate swaps included in Other current assets was \$1 million.

Fair value of financial instruments

The financial instruments that the Company measures at fair value on a recurring basis in periods subsequent to initial recognition are categorized into the following levels of the fair value hierarchy based on the degree to which inputs are observable:

- Level 1: Inputs are quoted prices for identical instruments in active markets
- Level 2: Significant inputs (other than quoted prices included in Level 1) are observable
- Level 3: Significant inputs are unobservable

The carrying amounts of Cash and cash equivalents and Restricted cash and cash equivalents approximate fair value. These financial instruments include highly liquid investments purchased three months or less from maturity, for which the fair value is determined by reference to quoted prices in active markets.

The carrying amounts of Accounts receivable, Other current assets and Accounts payable and other approximate fair value due to their short maturity, unless otherwise specified. The fair value of derivative financial instruments, included in Other current assets and Accounts payable and other is classified as Level 2 and is used to manage the Company's exposure to foreign currency risk and interest rate risk. The fair value is measured by discounting future cash flows using a discount rate derived from market data for financial instruments subject to similar risks and maturities.

The carrying amount of the Company's debt does not approximate fair value. The fair value is estimated based on quoted market prices for the same or similar debt instruments, as well as discounted cash flows using current interest rates for debt with similar terms, company rating, and remaining maturity. The Company classifies debt as Level 2. As at March 31, 2025, the Company's debt, excluding finance leases, had a carrying amount of \$20,785 million (\$20,887 million as at December 31, 2024) and a fair value of \$19,679 million (\$19,688 million as at December 31, 2024). The carrying amount of debt excluding finance leases exceeded the fair value due to market rates being higher than the stated coupon rates.

12 – Segmented information

As at December 31, 2024, the Company has adopted *ASU 2023-07 Segment reporting (Topic 280): Improvements to reportable segment disclosures*. Additional details relating to the Company's segmented information is provided in *Note 23 - Segment information* to the Company's 2024 Annual Consolidated Financial Statements.

Net income and diluted earnings per share (EPS), which are reported on the Company's Consolidated Statements of Income, are the profit measures reviewed by the Chief Operating Decision Maker (CODM). These measures are used by the CODM to assess segment profitability, allocate resources across CN's network, benchmark performance against targets and industry standards, analyze trends for strategic planning and forecasting and communicating results to stakeholders.

Significant segment expenses regularly provided to the CODM and included within net income and EPS are the expense captions detailed in the Consolidated Statements of Income. The measure of segment assets is reported on the Consolidated Balance Sheets as Total assets. Segment property additions is reported on the Consolidated Statements of Cash Flows as Property additions.

MANAGEMENT'S DISCUSSION AND ANALYSIS

Forward-looking statements

Certain statements included in this Management's Discussion and Analysis (MD&A) are "forward-looking statements" within the meaning of the *United States Private Securities Litigation Reform Act of 1995* and under Canadian securities laws, including statements based on management's assessment and assumptions and publicly available information with respect to CN. By their nature, forward-looking statements involve risks, uncertainties and assumptions. CN cautions that its assumptions may not materialize and that current economic conditions render such assumptions, although reasonable at the time they were made, subject to greater uncertainty. Forward-looking statements may be identified by the use of terminology such as "believes," "expects," "anticipates," "assumes," "outlook," "plans," "targets", or other similar words.

Forward-looking statements include, but are not limited to, those set forth in the table below, which also presents key assumptions used in determining the forward-looking statements. See also the section of this MD&A entitled *2025 Business outlook and assumptions*.

Forward-looking statements	Key assumptions
Statements relating to revenue growth opportunities, including those referring to general economic and business conditions	• North American and global economic growth in the long term • Long-term growth opportunities being less affected by current economic conditions • No material disruption of CN's operations or of the economy's supply chains as a result of pandemics or geopolitical conflicts and tensions • No recession in the North American economy as a result of tariffs, trade barriers and trade actions taken by various governments and agencies globally
Statements relating to the Company's ability to meet debt repayments and future obligations in the foreseeable future, including income tax payments, and capital spending	• Adequate credit ratios • Investment-grade credit ratings • Access to capital markets • Adequate cash generated from operations and other sources of financing
Statements relating to pension contributions	• Adequate cash generated from operations and other sources of financing • Adequate long-term return on investment on pension plan assets • Level of funding as determined by actuarial valuations, particularly influenced by discount rates for funding purposes

Forward-looking statements are not guarantees of future performance and involve risks, uncertainties and other factors which may cause actual results, performance or achievements of CN to be materially different from the outlook or any future results, performance or achievements implied by such statements. Accordingly, readers are advised not to place undue reliance on forward-looking statements. Important risk factors that could affect the forward-looking statements include, but are not limited to, general economic and business conditions, including factors impacting global supply chains such as pandemics and geopolitical conflicts and tensions; trade restrictions, trade barriers, or the imposition of tariffs or other changes to international trade arrangements; industry competition; inflation, currency and interest rate fluctuations; changes in fuel prices; legislative and/or regulatory developments; compliance with environmental laws and regulations; actions by regulators; increases in maintenance and operating costs; security threats; reliance on technology and related cybersecurity risk; transportation of hazardous materials; various events which could disrupt operations, including illegal blockades of rail networks, and natural events such as severe weather, droughts, fires, floods and earthquakes; climate change; labor negotiations and disruptions; environmental claims; uncertainties of investigations, proceedings and other types of claims and litigation; risks and liabilities arising from derailments; timing and completion of capital programs; the availability of and cost competitiveness of renewable fuels and the development of new locomotive propulsion technology; reputational risks; supplier concentration; pension funding requirements and volatility; and other risks detailed from time to time in reports filed by CN with securities regulators in Canada and the U.S., including its Annual Information Form and Form 40-F. See the section entitled *Business risks* of this MD&A and the Company's 2024 Annual MD&A for a description of major risk factors relating to CN.

CN has sustainability-related commitments and climate goals, and continues to assess the impact on its operations of related initiatives, plans and proposals that CN and other stakeholders (including government, regulatory and other bodies) are pursuing in relation to climate change and carbon emissions. The achievement of CN's climate goals is subject to several risks and uncertainties, including those disclosed in the section entitled *Business risks: Reputation* of the Company's 2024 Annual MD&A. The achievement of these goals is also subject to circumstances outside of the Company's control, including the availability and cost competitiveness of renewable fuels and the development and availability of new technologies, such as alternative propulsion locomotive technologies, and the cooperation of third parties such as suppliers, customers, supply chain partners and regulators. While the Company currently believes its goals are reasonably achievable, there can be no certainty that the Company will achieve any or all of these goals within the stated timeframe, or that achieving any of these goals will meet all of the expectations of its stakeholders or applicable legal requirements. If the Company is unable to achieve its climate goals or satisfy the expectations of its stakeholders, its brand and reputation could be materially and adversely affected.

MANAGEMENT'S DISCUSSION AND ANALYSIS

Forward-looking statements reflect information as of the date on which they are made. CN assumes no obligation to update or revise forward-looking statements to reflect future events, changes in circumstances, or changes in beliefs, unless required by applicable securities laws. In the event CN does update any forward-looking statement, no inference should be made that CN will make additional updates with respect to that statement, related matters, or any other forward-looking statement. Information contained on, or accessible through, our website is not incorporated by reference into this MD&A.

Introduction

This MD&A dated May 1, 2025, relates to the consolidated financial position and results of operations of Canadian National Railway Company, together with its wholly-owned subsidiaries, collectively "CN" or the "Company," and should be read in conjunction with the Company's March 31, 2025 Interim Consolidated Financial Statements and Notes thereto. It should also be read in conjunction with the Company's 2024 Annual Consolidated Financial Statements, and the 2024 Annual MD&A. All financial information reflected herein is expressed in Canadian dollars and prepared in accordance with United States generally accepted accounting principles (GAAP), unless otherwise noted.

CN's common shares are listed on the Toronto and New York stock exchanges. Additional information about CN filed with Canadian securities regulatory authorities and the United States Securities and Exchange Commission (SEC), including the Company's 2024 Annual Information Form and Form 40-F, may be found online on SEDAR+ at www.sedarplus.ca, on the SEC's website at www.sec.gov through EDGAR, and on the Company's website at www.cn.ca in the Investors section. Printed copies of such documents may be obtained by contacting CN's Corporate Secretary's Office.

Quarterly highlights

First quarter of 2025 compared to first quarter of 2024

Financial results

- Revenues of \$4,403 million, an increase of \$154 million, or 4%.
- Operating income of \$1,610 million, an increase of \$64 million, or 4%.
- Operating ratio, defined as operating expenses as a percentage of revenues, of 63.4%, an improvement of 0.2 points.
- Diluted earnings per share (EPS) of \$1.85, an increase of 8%.
- Free cash flow of \$626 million, an increase of \$97 million, or 18%. ⁽¹⁾

Operating performance

- Injury frequency rate remained flat at 1.11 (per 200,000 person hours). ⁽²⁾
- Accident rate increased 21% to 2.09 (per million train miles). ⁽²⁾
- Through dwell increased 10% to 7.8 (entire railroad, hours).
- Car velocity decreased 8% to 189 (car miles per day).
- Through network train speed decreased 5% to 17.7 (mph).
- Fuel efficiency of 0.917 (US gallons of locomotive fuel consumed per 1,000 gross ton miles (GTMs)), less efficient by 2%.
- Train length decreased 1% to 7,708 (feet).
- Revenue ton miles (RTMs) increased 1% to 60,049 (millions).

(1) This non-GAAP measure does not have any standardized meaning prescribed by GAAP and therefore, may not be comparable to similar measures presented by other companies. See the section of this MD&A entitled *Liquidity and capital resources – Free cash flow* for an explanation and reconciliation of this non-GAAP measure.

(2) Based on Federal Railroad Administration (FRA) reporting criteria.

Leadership changes

On April 14, 2025, Bhushan Ivaturi was appointed as CN's Executive Vice-President and Chief Information and Technology Officer succeeding Dominique Malenfant. Mr. Ivaturi will work closely with Mr. Malenfant until his planned departure at the end of June 2025 to ensure a smooth transition.

MANAGEMENT'S DISCUSSION AND ANALYSIS

Acquisition

Iowa Northern Railway Company

On January 14, 2025, the Surface Transportation Board (STB) issued a final decision approving CN's application to acquire control of the Iowa Northern Railway Company (IANR), subject to certain conditions. The Company assumed control of IANR on March 1, 2025 (Control Date) and began consolidating IANR on that date, accounting for the acquisition as a business combination achieved in stages. The Company derecognized its previously held equity method investment in IANR of \$320 million as of March 1, 2025 and remeasured the investment at its Control Date fair value of \$344 million resulting in a net remeasurement gain of \$24 million recorded in Other income in the Consolidated Statements of Income. The fair value of the previously held equity interest in IANR was determined through use of a discounted cash flow approach, which incorporated the Company's best estimates of various assumptions including, but not limited to, discount rates and terminal growth rates and multiples.

The Company's Consolidated Balance Sheet includes the assets and liabilities of IANR as of the Control Date, and since that time, IANR's results of operations have been included in the Company's results of operations. The Company has not provided pro forma information relating to the pre-control date period as the acquisition was not material.

Labor and Workforce negotiations

As at March 31, 2025, CN employed a total of 18,050 employees in Canada, of which 13,075, or 72%, were unionized employees, and 6,861 employees in the U.S., of which 5,739, or 84%, were unionized employees.

Canadian workforce

Teamsters Canada Rail Conference

On April 7, 2025, an arbitrator issued a binding decision, setting the terms of a new three-year collective agreement between CN and Teamsters Canada Rail Conference (TCRC). The three-year agreement covers approximately 6,000 conductors, conductor trainees, yard coordinators and locomotive engineers across CN's network in Canada and is retroactively effective beginning January 1, 2024 until December 31, 2026.

International Brotherhood of Electric Workers

On February 14, 2025, the new collective agreement with the International Brotherhood of Electric Workers (IBEW) was ratified by its members. The four-year agreement covers approximately 750 Signals and Communications employees in Canada until December 31, 2028.

U.S. workforce

The general approach to labor negotiations by U.S. Class I railroads is to bargain on a collective national basis with the industry, which CN's subsidiaries Grand Trunk Western Railroad Company (GTW), companies owned by Illinois Central Corporation (ICC), Wisconsin Central Ltd. (WC), and Bessemer & Lake Erie Railroad Company (BLE) currently participate in for collective bargaining agreements covering all union-represented employees, with the exception of two employee groups working at Pittsburgh and Conneaut Dock Company (PCD). On November 1, 2024, the National Carriers Conference Committee (NCCC) served a Section 6 notice pursuant to the Railway Labor Act (RLA), which officially opened collective bargaining for the freight industry. As at the date of this MD&A, agreements have been reached and ratified with nine unions, and negotiations continue with the remaining three unions. There can be no strike or lockout until such time as the parties have failed to reach voluntary agreements and all dispute resolution mechanisms of the RLA have been exhausted. While negotiations are ongoing and until all RLA provisions have been exhausted, all existing contract terms remain in place.

2025 Business outlook and assumptions

The Company now assumes slightly positive growth in North American industrial production in 2025 (compared to its January 30, 2025 assumption of approximately 1%). For the 2024/2025 crop year, the grain crop in Canada was in line with its five-year average and the U.S. grain crop was above its five-year average. The Company continues to assume that the 2025/2026 grain crop in Canada will be in line with its five-year average and now assumes that the U.S. grain crop will be above its five-year average (compared to its January 30, 2025 assumption that the 2025/2026 grain crop in the U.S. will be in line with its five-year average). The Company notes there is a heightened recessionary risk related to tariffs and trade actions taken by various countries. Should the recessionary risk materialize, demand for freight transportation would be negatively impacted.

MANAGEMENT'S DISCUSSION AND ANALYSIS

In 2025, the Company continues to expect to invest approximately \$3.4 billion in its capital program, net of amounts reimbursed by customers, to improve the safety, efficiency and integrity of its network. These investments are intended to also enable and support the growth of the Company and will be financed with cash generated from operations or with cash from financing activities.

The forward-looking statements discussed in this *2025 Business outlook and assumptions* section are subject to risks and uncertainties that could cause actual results or performance to differ materially from those expressed or implied in such statements and are based on certain factors and assumptions which the Company considers reasonable, about events, developments, prospects and opportunities that may not materialize or that may be offset entirely or partially by other events and developments. In addition to the assumptions and expectations discussed in this section, reference should be made to the section of this MD&A entitled *Forward-looking statements* for assumptions and risk factors affecting such statements.

(1) Operating ratio is defined as operating expenses as a percentage of revenues.

(2) This non-GAAP measure does not have any standardized meaning prescribed by GAAP and therefore, may not be comparable to similar measures presented by other companies. See the section of this MD&A entitled *Liquidity and capital resources – Free cash flow* for an explanation of this non-GAAP measure.

(3) Total long-term liabilities is the difference between Total liabilities and Total current liabilities.

Results of operations

First quarter of 2025 compared to corresponding period in 2024

Revenues for the first quarter of 2025 were \$4,403 million compared to \$4,249 million for the same period in 2024, an increase of \$154 million, or 4%. The increase was mainly due to higher volumes and higher freight revenue per RTM:

- Volumes: volumes increased mainly due to higher exports of Canadian and U.S. grain and coal; partly offset by reduced potash exports and iron ore shipments.
- Freight revenue per RTM: increased mainly due to freight rate increases and the positive translation impact of a weaker Canadian dollar; partly offset by lower applicable fuel surcharge rates and an increase in the average length of haul.

Operating expenses for the first quarter of 2025 were \$2,793 million compared to \$2,703 million for the same period in 2024. The increase of \$90 million, or 3%, was mainly due the negative translation impact of a weaker Canadian dollar, higher depreciation and amortization expense and higher equipment rents expense.

MANAGEMENT'S DISCUSSION AND ANALYSIS

Operating income for the first quarter of 2025 increased by \$64 million, or 4%, to \$1,610 million when compared to the same period in 2024. The operating ratio, defined as operating expenses as a percentage of revenues, was 63.4% in the first quarter of 2025 compared to 63.6% in the first quarter of 2024, a 0.2-point improvement.

Net income for the first quarter of 2025 was \$1,161 million, an increase of \$58 million, or 5%, and diluted earnings per share increased by 8% to \$1.85, when compared to the same period in 2024.

	Three months ended March 31		
	2025	2024	% Change Fav (Unfav)
Gross ton miles (GTMs) (millions) ⁽¹⁾	114,843	115,627	(1%)
Train weight (tons) ⁽²⁾	9,078	9,087	—%
Train length (feet) ⁽³⁾	7,708	7,787	(1%)
Through network train speed (miles per hour) ⁽⁴⁾	17.7	18.7	(5%)
Fuel efficiency (US gallons of locomotive fuel consumed per 1,000 GTMs) ⁽⁵⁾	0.917	0.896	(2%)
Through dwell (entire railroad, hours) ⁽⁶⁾	7.8	7.1	(10%)
Car velocity (car miles per day) ⁽⁷⁾	189	205	(8%)

- (1) GTMs: The workload performed by system trains in hauling freight or equipment. GTMs are calculated by multiplying the trailing weight by the distance the train moved. A larger number is an indicator of more traffic (and thus more revenue) being moved.
- (2) Train weight: An efficiency measurement on how much tonnage each mainline train handles on average as it crosses the network. Calculated as the total of GTMs and divided by total train miles, this measure provides insight on how well each train was maximized in terms of its capacity to move traffic. This operating measure was formerly named Train productivity.
- (3) Train length: An efficiency measurement on average trailing length of each mainline train on the network. Calculated as the total of car foot miles (the sum of car length multiplied by miles travelled for each trailing car) divided by total train miles, this measure provides insight on how well each train was maximized in terms of its capacity to move traffic.
- (4) Through network train speed: A measure of the line-haul movement from origin to destination, including time at terminals. The average speed is calculated by dividing train miles by total hours operated, excluding yard and local trains, passenger trains, maintenance of way trains, and foreign trains. This measure represents the fluidity of trains on the network, with a higher value also indicating a more fluid network.
- (5) Fuel efficiency: This measure represents how efficient the Company is in the generation and utilization of locomotive horsepower in freight train operations, with a lower number indicating improved performance. Fuel efficiency is defined as US gallons of locomotive fuel consumed per 1,000 GTMs.
- (6) Through dwell: The average time a car resides within terminal boundaries expressed in hours. The measurement begins with a customer release, received interchange, or train arrival event and ends with a customer placement (actual or constructive), delivered or offered in interchange, or train departure event. This excludes stored, bad ordered, maintenance of way cars, or cars with dwell greater than 10 days. This measure represents the efficiency of handling cars within the terminal, with a lower value indicating higher performance.
- (7) Car velocity: The average miles per day traveled by loaded and empty cars (including all active cars whether private, foreign or CN owned) on company lines. This measure represents the fluidity of cars on the network, calculated by the sum of miles each car traveled divided by the sum of all of the cars' active time, with a higher value indicating a smoother and more fluid operation.

Less favorable winter operating conditions in the first quarter of 2025 when compared to the first quarter of 2024 negatively impacted most operating metrics. CN's Winter Operating Plan implements train length restrictions and speed restrictions at temperatures below a certain point, which constrain car velocity and network fluidity.

Non-GAAP measures

This MD&A makes reference to non-GAAP measures, including adjusted performance measures, constant currency, free cash flow and adjusted debt-to-adjusted EBITDA multiple that do not have any standardized meaning prescribed by GAAP and therefore, may not be comparable to similar measures presented by other companies. From management's perspective, these non-GAAP measures are useful measures of performance and provide investors with supplementary information to assess the Company's results of operations and liquidity. These non-GAAP measures should not be considered in isolation or as a substitute for financial measures prepared in accordance with GAAP.

For further details of these non-GAAP measures, including a reconciliation to the most directly comparable GAAP financial measures, refer to the sections of this MD&A entitled *Non-GAAP measures: Constant currency*, as well as the section entitled *Liquidity and capital resources: Free cash flow and Adjusted debt-to-adjusted EBITDA multiple*. The Company did not present any adjusted performance measures (adjusted net income, adjusted diluted earnings per share, adjusted operating income, adjusted operating expenses and adjusted operating ratio) as there were no adjustments in the first quarter of 2025 and 2024.

MANAGEMENT'S DISCUSSION AND ANALYSIS

Constant currency

Financial results at constant currency allow results to be viewed without the impact of fluctuations in foreign currency exchange rates, thereby facilitating period-to-period comparisons in the analysis of trends in business performance. Measures at constant currency are considered non-GAAP measures and do not have any standardized meaning prescribed by GAAP and therefore, may not be comparable to similar measures presented by other companies. Financial results at constant currency are obtained by translating the current period results denominated in US dollars at the weighted average foreign exchange rates used to translate transactions denominated in US dollars of the comparable period of the prior year.

The average foreign exchange rates were \$1.435 and \$1.349 per US\$1.00 for the three months ended March 31, 2025 and 2024 respectively. On a constant currency basis, the Company's net income for the three months ended March 31, 2025 would have been lower by \$34 million (\$0.05 per diluted share).

The following table provides a reconciliation of the impact of constant currency and related percentage change at constant currency on the financial results, as reported for the three months ended March 31, 2025:

<i>In millions, except per share data</i>	Three months ended March 31			
	2025	Constant currency impact	2024	% Change at constant currency Fav (Unfav)

Intermodal	940	959	(2%)	(3%)
Automotive	219	216	1%	(3%)
Total freight revenues	\$ 4,288	\$ 4,137	4%	—%
Revenue ton miles (RTMs) (millions) ⁽²⁾	60,049	59,749	1%	1%
Freight revenue/RTM (cents) ⁽³⁾	7.14	6.92	3%	—%
Carloads (thousands)	1,313	1,343	(2%)	(2%)
Freight revenue/carload (\$)	3,266	3,080	6%	3%

(1) This non-GAAP measure does not have any standardized meaning prescribed by GAAP and therefore, may not be comparable to similar measures presented by other companies. See the section of this MD&A entitled *Non-GAAP measures – Constant currency* for an explanation of this non-GAAP measure.

(2) RTMs is a measure of volumes and is calculated by multiplying the weight in tons of the shipment lading being transported by the number of miles that the shipment is transported on company lines. CN uses RTMs as the primary measure of volumes as compared to Carloads, since RTMs also takes into account the length of haul and weight in the movement.

(3) Freight revenue per RTM is an indicator of yield and represents revenue earned for transporting one ton of freight over a distance of one mile.

Revenues for the first quarter of 2025 were \$4,403 million compared to \$4,249 million for the same period in 2024, an increase of \$154 million, or 4%. The increase was mainly due to higher volumes and higher freight revenue per RTM:

- Volumes: volumes increased mainly due to higher exports of Canadian and U.S. grain and coal; partly offset by reduced potash exports and iron ore shipments.
- Freight revenue per RTM: increased mainly due to freight rate increases and the positive translation impact of a weaker Canadian dollar; partly offset by lower applicable fuel surcharge rates and an increase in the average length of haul.

Fuel surcharge revenues decreased by \$89 million in the first quarter of 2025 compared to the same period in 2024, mainly due to lower applicable fuel surcharge rates.

Petroleum and chemicals

	Three months ended March 31			
	2025	2024	% Change	% Change at constant currency
Revenues (millions)	\$ 915	\$ 857	7%	3%
RTMs (millions)	11,836	11,714	1%	1%
Revenue/RTM (cents)	7.73	7.32	6%	2%
Carloads (thousands)	163	165	(1%)	(1%)
Revenue/carload (\$)	5,613	5,194	8%	4%

MANAGEMENT'S DISCUSSION AND ANALYSIS

Revenues for this commodity group increased by \$58 million, or 7%, in the first quarter of 2025, when compared to the same period in 2024, mainly due to higher volumes and higher revenue per RTM:

- Volumes: increased mainly due to higher exports of natural gas liquids and higher shipments of plastics; partly offset by lower domestic volumes of refined petroleum products mainly due to operational issues at a customer facility.
- Revenue per RTM: increased mainly due to freight rate increases and the positive translation impact of a weaker Canadian dollar; partly offset by lower applicable fuel surcharge rates and an increase in the average length of haul.

Metals and minerals

	Three months ended March 31			
	2025	2024	% Change	% Change at constant currency
Revenues (<i>millions</i>)	\$ 523	\$ 530	(1%)	(6%)
RTMs (<i>millions</i>)	6,752	7,350	(8%)	(8%)
Revenue/RTM (<i>cents</i>)	7.75	7.21	7%	2%
Carloads (<i>thousands</i>)	213	240	(11%)	(11%)
Revenue/carload (\$)	2,455	2,208	11%	6%

Revenues for this commodity group decreased by \$7 million, or 1%, in the first quarter of 2025, when compared to the same period in 2024, mainly due to lower volumes; partly offset by higher revenue per RTM:

- Volumes: decreased mainly due to weaker demand for iron ore and lower shipments of frac sand mainly as a result of unfavorable seasonal conditions resulting in train length and speed restrictions.
- Revenue per RTM: increased mainly due to the positive translation impact of a weaker Canadian dollar and freight rate increases; partly offset by lower applicable fuel surcharge rates and an increase in the average length of haul.

Carloads decreased more than RTMs in the first quarter of 2025 when compared to the same period in 2024, mainly due to lower short-haul shipments of iron ore.

Forest products

	Three months ended March 31			
	2025	2024	% Change	% Change at constant currency
Revenues (<i>millions</i>)	\$ 494	\$ 494	—%	(5%)
RTMs (<i>millions</i>)	5,387	5,769	(7%)	(7%)
Revenue/RTM (<i>cents</i>)	9.17	8.56	7%	2%
Carloads (<i>thousands</i>)	73	78	(6%)	(6%)
Revenue/carload (\$)	6,767	6,333	7%	2%

Revenues for this commodity group in the first quarter of 2025 were in line with the same period in 2024, mainly due to higher revenue per RTM; offset by lower volumes:

- Volumes: decreased mainly due to lower shipments of lumber and woodpulp, mainly as a result of unfavorable seasonal conditions resulting in train length and speed restrictions.
- Revenue per RTM: increased mainly due to the positive translation impact of a weaker Canadian dollar and freight rate increases; partly offset by lower applicable fuel surcharge rates.

MANAGEMENT'S DISCUSSION AND ANALYSIS

Coal

	Three months ended March 31			
	2025	2024	% Change	% Change at constant currency
Revenues (<i>millions</i>)	\$ 246	\$ 221	11%	9%
RTMs (<i>millions</i>)	5,446	4,638	17%	17%
Revenue/RTM (<i>cents</i>)	4.52	4.76	(5%)	(7%)
Carloads (<i>thousands</i>)	118	112	5%	5%
Revenue/carload (\$)	2,085	1,973	6%	3%

Revenues for this commodity group increased by \$25 million, or 11%, in the first quarter of 2025, when compared to the same period in 2024, mainly due to higher volumes; partly offset by lower revenue per RTM:

- Volumes: increased mainly due to higher exports of U.S. thermal coal and Canadian metallurgical and thermal coal.
- Revenue per RTM: decreased mainly due to a significant increase in the average length of haul and lower applicable fuel surcharge rates; partly offset by freight rate increases and the positive translation impact of a weaker Canadian dollar.

RTMs increased more than Carloads in the first quarter of 2025 when compared to the same period in 2024, mainly due to higher long-haul shipments of U.S. thermal coal exports.

Grain and fertilizers

	Three months ended March 31			
	2025	2024	% Change	% Change at constant currency
Revenues (<i>millions</i>)	\$ 951	\$ 860	11%	7%
RTMs (<i>millions</i>)	17,250	17,032	1%	1%
Revenue/RTM (<i>cents</i>)	5.51	5.05	9%	6%
Carloads (<i>thousands</i>)	178	171	4%	4%
Revenue/carload (\$)	5,343	5,029	6%	3%

Revenues for this commodity group increased by \$91 million, or 11%, in the first quarter of 2025, when compared to the same period in 2024, mainly due to higher volumes and higher revenue per RTM:

- Volumes: increased mainly due to higher Canadian and U.S. grain for offshore export; partly offset by reduced potash exports due to a temporary east coast terminal outage.
- Revenue per RTM: increased mainly due to freight rate increases, the positive translation impact of a weaker Canadian dollar and a decrease in the average length of haul; partly offset by lower applicable fuel surcharge rates.

Carloads increased more than RTMs in the first quarter of 2025 when compared to the same period in 2024, mainly due to reduced long-haul shipments of potash exports from Saskatchewan to the east coast of Canada.

MANAGEMENT'S DISCUSSION AND ANALYSIS

Intermodal

	Three months ended March 31			
	2025	2024	% Change	% Change at constant currency
Revenues (<i>millions</i>)	\$ 940	\$ 959	(2%)	(3%)
RTMs (<i>millions</i>)	12,586	12,531	—%	—%
Revenue/RTM (<i>cents</i>)	7.47	7.65	(2%)	(4%)
Carloads (<i>thousands</i>)	517	527	(2%)	(2%)
Revenue/carload (\$)	1,818	1,820	—%	(2%)

Revenues for this commodity group decreased by \$19 million, or 2%, in the first quarter of 2025, when compared to the same period in 2024, mainly due to lower revenue per RTM while volumes remained flat:

- Volumes: remained flat mainly due to higher shipments of international intermodal driven by imports from the Port of Vancouver and the Port of Halifax; offset by lower imports from the Port of Prince Rupert.
- Revenue per RTM: decreased mainly due to lower applicable fuel surcharge rates; partly offset by the positive translation impact of a weaker Canadian dollar and freight rate increases.

Automotive

	Three months ended March 31			
	2025	2024	% Change	% Change at constant currency
Revenues (<i>millions</i>)	\$ 219	\$ 216	1%	(3%)
RTMs (<i>millions</i>)	792	715	11%	11%
Revenue/RTM (<i>cents</i>)	27.65	30.21	(8%)	(13%)
Carloads (<i>thousands</i>)	51	50	2%	2%
Revenue/carload (\$)	4,294	4,320	(1%)	(5%)

Revenues for this commodity group increased by \$3 million, or 1%, in the first quarter of 2025, when compared to the same period in 2024, mainly due to higher volumes; partly offset by lower revenue per RTM:

- Volumes: increased mainly due to higher domestic shipments of finished vehicles within North America.
- Revenue per RTM: decreased mainly due to lower applicable fuel surcharge rates and an increase in the average length of haul; partly offset by the positive translation impact of a weaker Canadian dollar and freight rate increases.

RTMs increased more than Carloads in the first quarter of 2025 when compared to the same period in 2024, mainly due to lower short-haul domestic shipments of finished vehicles.

Other revenues

	Three months ended March 31			
	2025	2024	% Change	% Change at constant currency
Revenues (<i>millions</i>)	\$ 115	\$ 112	3%	(1%)

Other revenues increased by \$3 million, or 3%, in the first quarter of 2025, when compared to the same period in 2024, mainly due to the positive translation impact of a weaker Canadian dollar.

MANAGEMENT'S DISCUSSION AND ANALYSIS

Operating expenses

Operating expenses for the first quarter of 2025 were \$2,793 million compared to \$2,703 million for the same period in 2024. The increase of \$90 million, or 3%, was mainly due to the negative translation impact of a weaker Canadian dollar, higher depreciation and amortization expense and higher equipment rents expense.

<i>In millions, unless otherwise indicated</i>	Three months ended March 31			
	2025	2024	% Change	% Change at constant currency ⁽¹⁾
Labor and fringe benefits	\$ 920	\$ 894	(3%)	(1%)
Purchased services and material	577	571	(1%)	1%
Fuel	518	514	(1%)	5%
Depreciation and amortization	493	462	(7%)	(4%)
Equipment rents	118	99	(19%)	(13%)
Other	167	163	(2%)	2%
Total operating expenses	\$ 2,793	\$ 2,703	(3%)	—%

(1) This non-GAAP measure does not have any standardized meaning prescribed by GAAP and therefore, may not be comparable to similar measures presented by other companies. See the section of this MD&A entitled *Non-GAAP measures – Constant currency* for an explanation of this non-GAAP measure.

Labor and fringe benefits

Labor and fringe benefits expense increased by \$26 million, or 3%, in the first quarter of 2025 when compared to the same period in 2024. The increase was mainly due to general wage increases and the negative translation impact of a weaker Canadian dollar; partly offset by lower average headcount.

Purchased services and material

Purchased services and material expense increased by \$6 million, or 1%, in the first quarter of 2025 when compared to the same period in 2024.

Fuel

Fuel expense increased by \$4 million, or 1%, in the first quarter of 2025 when compared to the same period in 2024. The increase was mainly due to the negative translation impact of a weaker Canadian dollar and lower fuel efficiency; partly offset by lower fuel prices.

Depreciation and amortization

Depreciation and amortization expense increased by \$31 million, or 7%, in the first quarter of 2025 when compared to the same period in 2024. The increase was mainly due to a higher depreciable asset base and the negative translation impact of a weaker Canadian dollar.

Equipment rents

Equipment rents expense increased by \$19 million, or 19%, in the first quarter of 2025 when compared to the same periods in 2024. The increase was mainly due to higher locomotive horse-power expense and the negative translation impact of a weaker Canadian dollar.

Other

Other expense increased by \$4 million, or 2%, in the first quarter of 2025 when compared to the same period in 2024. The increase was mainly due to the negative translation impact of a weaker Canadian dollar.

MANAGEMENT'S DISCUSSION AND ANALYSIS

Other income and expense

Interest expense

Interest expense was \$233 million for the three months ended March 31, 2025 compared to \$210 million for the same period in 2024. The increase of \$23 million was mainly due to the higher average level of debt, the negative translation of a weaker Canadian dollar and higher average interest rates.

Other components of net periodic benefit income

Other components of net periodic benefit income was \$125 million for the three months ended March 31, 2025 compared to \$113 million for the same period in 2024. The increase was mainly due to lower interest cost which primarily resulted from changes to discount rates determined at December 31, 2024.

Other income

Other income was \$25 million for the three months ended March 31, 2025, compared to \$2 million for the same period in 2024. The increase of \$23 million was mainly due to the fair value remeasurement of CN's investment in IANR as a result of CN acquiring control on March 1, 2025.

Income tax expense

Income tax expense was \$366 million for the three months ended March 31, 2025 compared to \$348 million for the same period in 2024. The effective tax rate for the three months ended March 31, 2025 and 2024 was 24.0%.

(1) Certain quarters include items that management believes do not necessarily arise as part of CN's normal day-to-day operations and can distort the analysis of trends in business performance. See the section entitled *Non-GAAP measures* of the Company's 2024 Annual MD&A for additional information on these items.

Revenues generated by the Company during the year are influenced by seasonal weather conditions, general economic conditions, cyclical demand for rail transportation and competitive forces in the transportation marketplace (see the section entitled *Business risks* of the Company's 2024 Annual MD&A). Operating expenses reflect the impact of freight volumes, seasonal weather conditions, labor costs, fuel prices and the Company's productivity initiatives. Fluctuations in the Canadian dollar relative to the US dollar have also affected the conversion of the Company's US dollar-denominated revenues and expenses and resulted in fluctuations in Net income in the rolling eight quarters presented above.

Liquidity and capital resources

An analysis of the Company's liquidity and capital resources is provided in the section entitled *Liquidity and capital resources* of the Company's 2024 Annual MD&A. There were no significant changes during the first quarter of 2025, except as noted below.

As at March 31, 2025 and December 31, 2024, the Company had Cash and cash equivalents of \$232 million and \$389 million, respectively; Restricted cash and cash equivalents of \$12 million and \$12 million, respectively; and a working capital deficit of \$1,634 million and \$1,357 million, respectively. ⁽¹⁾ There are currently no specific requirements relating to working capital other than in the normal course of business as discussed herein. The Company expects cash from operations and its various sources of financing to be sufficient to meet its ongoing obligations.

(1) The Company defines working capital as current assets of \$2,676 million (December 31, 2024 - \$2,619 million) less current liabilities of \$4,310 million (December 31, 2024 - \$3,976 million).

MANAGEMENT'S DISCUSSION AND ANALYSIS

Available financing sources

For details on the Company's available financing sources, see section entitled *Liquidity and capital resources* to the Company's 2024 Annual MD&A as well as *Note 7 – Financing activities* to the Company's March 31, 2025 Interim Consolidated Financial Statements.

Revolving credit facilities

On March 28, 2025, the Company's revolving credit facility agreements were amended to extend their respective tenors by one additional year each. The unsecured credit facility of \$2.5 billion consists of two tranches of \$1.25 billion and are now maturing on March 31, 2028 and March 31, 2030, respectively. The unsecured credit facility of \$1.0 billion is now maturing on March 17, 2027. The credit facilities provide borrowings at various benchmark interest rates, such as the Secured Overnight Financing Rate (SOFR) and the Canadian Overnight Repo Rate Average (CORRA), plus applicable margins, based on CN's credit ratings.

As at March 31, 2025 and December 31, 2024, the Company had no outstanding borrowings under these revolving credit facilities.

Equipment loans

Borrowings under the non-revolving term loan facilities are provided at SOFR or CORRA plus applicable margins.

During the first three months of 2025, the Company repaid \$23 million of its equipment loans. As at March 31, 2025 and December 31, 2024, the Company had outstanding borrowings of \$1,426 million and \$1,449 million, respectively, and had no further amounts available to be drawn under these facilities.

Commercial paper

As at March 31, 2025 and December 31, 2024, the Company had total commercial paper borrowings of US\$438 million (\$630 million) and US\$501 million (\$721 million), respectively, presented in Current portion of long-term debt on the Consolidated Balance Sheets.

Accounts receivable securitization program

On March 28, 2025, the Company extended the term of its agreement by one year to February 2, 2027. As at March 31, 2025 and December 31, 2024, the Company had no outstanding borrowings under the accounts receivable securitization program.

Bilateral letter of credit facilities

On March 28, 2025, the Company extended the maturity date of its committed bilateral letter of credit facility agreements to April 28, 2028.

As at March 31, 2025, the Company had outstanding letters of credit of \$326 million (\$329 million as at December 31, 2024) under the committed facilities and \$142 million (\$142 million as at December 31, 2024) under the uncommitted facilities.

Credit ratings

The following table provides the Company's long-term debt and commercial paper credit ratings as of the date of this MD&A.

	Outlook	Long-term debt rating ⁽¹⁾	Commercial paper rating ⁽¹⁾
DBRS Morningstar	Stable	A	R-1 (low)
Moody's Investors Service	Stable	A2	P-1
S&P Global Ratings	Stable	A-	A-2

(1) These credit ratings are not recommendations to purchase, hold, or sell the securities referred to above. Ratings may be revised or withdrawn at any time by the credit rating agencies. Each credit rating should be evaluated independently of any other credit rating.

MANAGEMENT'S DISCUSSION AND ANALYSIS

Cash flows

<i>In millions</i>	Three months ended March 31		
	2025	2024	Variance
Net cash provided by operating activities	\$ 1,164	\$ 1,117	\$ 47
Net cash used in investing activities	(538)	(588)	50
Net cash used in financing activities	(783)	(593)	(190)
Effect of foreign exchange fluctuations on cash, cash equivalents, restricted cash, and restricted cash equivalents	—	1	(1)
Net increase (decrease) in cash, cash equivalents, restricted cash, and restricted cash equivalents	(157)	(63)	(94)
Cash, cash equivalents, restricted cash, and restricted cash equivalents, beginning of period	401	924	(523)
Cash, cash equivalents, restricted cash, and restricted cash equivalents, end of period	\$ 244	\$ 861	\$ (617)

Free cash flow

Free cash flow is a useful measure of liquidity as it demonstrates the Company's ability to generate cash for debt obligations and for discretionary uses such as payment of dividends, share repurchases, and strategic opportunities. The Company defines its free cash flow measure as the difference between net cash provided by operating activities and net cash used in investing activities, adjusted for the impact of (i) business acquisitions and combinations (ii) merger transaction-related payments, cash receipts and cash income taxes, which are items that are not indicative of operating trends. Free cash flow does not have any standardized meaning prescribed by GAAP and therefore, may not be comparable to similar measures presented by other companies.

The following table provides a reconciliation of Net cash provided by operating activities in accordance with GAAP, as reported for the three months ended March 31, 2025 and 2024, to the non-GAAP free cash flow presented herein:

<i>In millions</i>	Three months ended March 31	
	2025	2024
Net cash provided by operating activities	\$ 1,164	\$ 1,117
Net cash used in investing activities	(538)	(588)
Free cash flow	\$ 626	\$ 529

Operating activities

Net cash provided by operating activities increased by \$47 million in the first quarter of 2025 when compared to the same period in 2024, mainly due to higher operating income.

Pension contributions

The Company's contributions to its various defined benefit pension plans are made in accordance with the applicable legislation in Canada and the U.S. and such contributions follow minimum and maximum thresholds as determined by actuarial valuations.

Additional information relating to the pension plans is provided in *Note 17 – Pensions and other postretirement benefits* to the Company's 2024 Annual Consolidated Financial Statements and the section entitled *Liquidity and capital resources* of the Company's 2024 Annual MD&A.

Pension contributions for all plans for the three months ended March 31, 2025 and 2024 were \$20 million and \$15 million, respectively. During the first quarter of 2025, one of CN's Canadian defined contribution pension plans was merged into the CN Pension Plan, and did not result in a remeasurement of the funded status of that plan. Based on the results of the Company's actuarial valuations for funding purposes as at December 31, 2023, the CN Pension Plan remained fully funded and at a level such that the Company continues to be prohibited from making contributions to the defined benefit component of the CN Pension Plan. Given the solvency ratio of certain Canadian registered defined benefit pension plans is above a specified threshold as at the last filed actuarial valuation, their next actuarial valuation for funding purposes would be required as at December 31, 2026, to be performed in 2027, although the valuation may be conducted earlier at the Company's discretion for those plans. Based on the anticipated results of these valuations, the CN Pension Plan is expected to remain fully funded and at a level such that the Company would continue to be prohibited from making contributions to the defined benefit component of the CN Pension Plan in 2025. As such, total cash contributions of approximately \$80 million are expected to be made in 2025 for all pension plans other than the defined benefit component of the CN Pension Plan.

MANAGEMENT'S DISCUSSION AND ANALYSIS

Adverse changes to the assumptions used to calculate the Company's funding status, particularly the discount rate, as well as changes to existing federal pension legislation or regulator guidance could significantly impact the Company's future pension contributions.

Income tax payments

Net income tax payments for the three months ended March 31, 2025 and 2024 were \$212 million and \$370 million, respectively. The decrease was mainly due to lower required installment payments in Canada. For 2025, the Company's net income tax payments are now expected to be approximately \$1.1 billion.

Investing activities

Net cash used in investing activities decreased by \$50 million in the first quarter of 2025 when compared to the same period in 2024, mainly due to lower property additions.

Property additions

<i>In millions</i>	Three months ended March 31	
	2025	2024
Track and roadway	\$ 282	\$ 269
Rolling stock	77	187
Buildings	16	15
Information technology	76	72
Other	68	33
Property additions	\$ 519	\$ 576

2025 Capital expenditure program

In 2025, the Company will continue to invest in its capital program to improve the safety, efficiency and integrity of its network. These investments will enable and support the growth of the Company and will be financed with cash generated from operations or with cash from financing activities as required.

Financing activities

Net cash used in financing activities increased by \$190 million in the first quarter of 2025 when compared to the same period in 2024. The increase was mainly due to higher net repayments of debt including commercial paper; partly offset by lower repurchases of common shares.

Debt financing activities

Debt financing activities in the first quarter of 2025 included the following:

- Net repayment of commercial paper of \$105 million.

Debt financing activities in the first quarter of 2024 included the following:

- Net issuance of commercial paper of \$458 million;
- On March 22, 2024, issuance of a \$412 million equipment loan under the non-revolving credit facility;
- Proceeds from the accounts receivable securitization program of \$450 million; and
- Repayment of accounts receivable securitization borrowings of \$350 million.

Additional information relating to the Company's outstanding debt securities is provided in *Note 15 – Debt* to the Company's 2024 Annual Consolidated Financial Statements.

MANAGEMENT'S DISCUSSION AND ANALYSIS

Repurchase of common shares

The Company may repurchase its common shares pursuant to a Normal Course Issuer Bid (NCIB) at prevailing market prices plus brokerage fees, or such other prices as may be permitted by the Toronto Stock Exchange. Under its current NCIB, the Company may repurchase up to 20.0 million common shares between February 4, 2025 and February 3, 2026. As at March 31, 2025, the Company had not repurchased any common shares under its current NCIB. Share repurchases may resume as the Company continues to assess its capital position.

During the first quarter of 2025, the Company paid \$51 million to the Canadian tax authorities related to the two percent tax on net shares repurchased during the year ended December 31, 2024.

The Company repurchased 13.9 million common shares under its previous NCIB, including 0.6 million common shares in the first quarter of 2025, which allowed for the repurchase of up to 32.0 million common shares between February 1, 2024 and January 31, 2025.

<i>In millions, except per share data</i>	Three months ended March 31	
	2025	2024
Number of common shares repurchased	0.6	5.6
Weighted-average price per share ⁽¹⁾	\$ 150.15	\$ 171.98
Amount of repurchase ⁽¹⁾⁽²⁾	\$ 101	\$ 955

(1) Includes brokerage fees and tax on share repurchases.

(2) Includes settlements in subsequent periods.

Dividends paid

The Company paid quarterly dividends of \$0.8875 per share amounting to \$557 million in the first quarter of 2025 compared to \$540 million, at the quarterly rate of \$0.8450 per share for the same period in 2024.

Contractual obligations

In the normal course of business, the Company incurs contractual obligations. The following table sets forth the Company's contractual obligations for the following items as at March 31, 2025:

<i>In millions</i>	Total	2025	2026	2027	2028	2029	2030 & thereafter
Debt obligations ⁽¹⁾⁽²⁾	\$ 20,783	\$ 1,055	\$ 799	\$ 82	\$ 1,115	\$ 1,134	\$ 16,598
Interest on debt obligations ⁽²⁾	14,062	606	851	839	840	762	10,164
Finance lease obligations	8	2	4	1	1	—	—
Operating lease obligations ⁽³⁾	723	118	114	84	51	24	332
Purchase obligations ⁽⁴⁾	2,738	1,845	280	217	305	70	21
Other long-term liabilities ⁽⁵⁾	1,029	85	60	57	52	46	729
Total contractual obligations	\$ 39,343	\$ 3,711	\$ 2,108	\$ 1,280	\$ 2,364	\$ 2,036	\$ 27,844

(1) Presented net of unamortized discounts and debt issuance costs and excludes finance lease obligations.

(2) Includes the impact of the cross-currency interest rate swaps. Additional information on the cross-currency interest rate swaps is provided in *Note 11 - Financial Instruments*.

(3) Includes \$257 million of imputed interest.

(4) Includes fixed and variable commitments for rail, information technology services and licenses, locomotives, engineering services, rail ties, railroad cars, wheels, as well as other equipment and services. Costs of variable commitments were estimated using forecasted prices and volumes.

(5) Includes expected payments for workers' compensation, pension benefit payments for the Company's non-registered supplemental pension plan, postretirement benefits other than pensions, net unrecognized tax benefits and environmental liabilities.

MANAGEMENT'S DISCUSSION AND ANALYSIS

Adjusted debt-to-adjusted EBITDA multiple

Management believes that the adjusted debt-to-adjusted EBITDA multiple is a useful credit measure because it reflects the Company's ability to service its debt and other long-term obligations. The Company calculates the adjusted debt-to-adjusted EBITDA multiple as adjusted debt divided by the last twelve months of adjusted EBITDA. Adjusted debt is defined as the sum of Long-term debt and Current portion of long-term debt as reported on the Company's Consolidated Balance Sheets as well as Operating lease liabilities, including current portion and pension plans in deficiency recognized on the Company's Consolidated Balance Sheets due to the debt-like nature of their contractual and financial obligations. Adjusted EBITDA is calculated as Net income excluding Interest expense, Income tax expense, Depreciation and amortization, operating lease cost, Other components of net periodic benefit income, Other income (loss), and other significant items that are not reflective of CN's underlying business operations and which could distort the analysis of trends in business performance. Adjusted debt and adjusted EBITDA are non-GAAP measures used to compute the adjusted debt-to-adjusted EBITDA multiple. These measures do not have any standardized meaning prescribed by GAAP and therefore, may not be comparable to similar measures presented by other companies.

The following table provides a reconciliation of debt and Net income in accordance with GAAP, reported as at and for the twelve months ended March 31, 2025 and 2024, to the adjusted measures presented herein, which have been used to calculate the non-GAAP adjusted debt-to-adjusted EBITDA multiple:

<i>In millions, unless otherwise indicated</i>	<i>As at and for the twelve months ended March 31,</i>	2025	2024
Debt	\$	20,792	\$ 19,761
Adjustments:			
Operating lease liabilities, including current portion ⁽¹⁾		466	387
Pension plans in deficiency ⁽²⁾		348	360
Adjusted debt	\$	21,606	\$ 20,508
Net income	\$	4,506	\$ 5,508
Interest expense		914	767
Income tax expense		1,422	814
Depreciation and amortization		1,923	1,831
Operating lease cost ⁽³⁾		155	151
Other components of net periodic benefit income		(466)	(473)
Other income		(65)	(135)
Adjustment:			
Loss on assets held for sale ⁽⁴⁾		78	—
Adjusted EBITDA	\$	8,467	\$ 8,463
Adjusted debt-to-adjusted EBITDA multiple (times)		2.55	2.42

(1) Represents the present value of operating lease payments.

(2) Represents the total funded deficit of all defined benefit pension plans with a projected benefit obligation in excess of plan assets.

(3) Represents the operating lease costs recorded in Purchased services and material and Equipment rents within the Consolidated Statements of Income.

(4) Relates to a loss on assets held for sale of \$78 million recorded in the second quarter of 2024, resulting from an agreement to transfer the ownership and related risks and obligations of the Quebec Bridge located in Quebec, Canada, to the Government of Canada. See the section entitled *2024 Highlights – Assets held for sale* of the Company's 2024 Annual MD&A for additional information.

Off balance sheet arrangements

Guarantees and indemnifications

In the normal course of business, the Company enters into agreements that may involve providing guarantees or indemnifications to third parties and others, which may extend beyond the term of the agreements. These include, but are not limited to, standby letters of credit, surety and other bonds, and indemnifications that are customary for the type of transaction or for the railway business. As at March 31, 2025, the Company has not recorded a liability with respect to guarantees and indemnifications. Additional information relating to guarantees and indemnifications is provided in *Note 10 – Major commitments and contingencies* to the Company's March 31, 2025 Interim Consolidated Financial Statements.

MANAGEMENT'S DISCUSSION AND ANALYSIS

Outstanding share data

As at May 1, 2025, the Company had 627.5 million common shares and 3.4 million stock options outstanding.

Financial instruments

Risk management

In the normal course of business, the Company is exposed to various risks from its use of financial instruments, such as credit risk, liquidity risk, and market risks which include foreign currency risk, interest rate risk and commodity price risk. A description of these risks and how the Company manages them, is provided in the section entitled *Financial instruments* of the Company's 2024 Annual MD&A.

Derivative financial instruments

Foreign currency risk

Foreign exchange forward contracts

As at March 31, 2025, the Company had outstanding foreign exchange forward contracts to purchase a notional value of US\$438 million (US\$580 million as at December 31, 2024). These outstanding contracts are at a weighted-average exchange rate of \$1.43 per US\$1.00 (\$1.37 per US\$1.00 as at December 31, 2024). The weighted-average term of the contracts is 30 days (88 days as at December 31, 2024). Changes in fair values of foreign exchange forward contracts, resulting from changes in foreign exchange rates, are recognized in Other income in the Consolidated Statements of Income as they occur.

For the three months ended March 31, 2025 and 2024, the Company recorded gains of \$3 million and \$52 million, respectively, related to foreign exchange forward contracts. These gains were largely offset by the re-measurement of US dollar-denominated monetary assets and liabilities recorded in Other income.

As at March 31, 2025, the fair value of outstanding foreign exchange forward contracts included in Other current assets and Accounts payable and other was \$2 million and \$1 million, respectively (\$38 million and \$nil, respectively, as at December 31, 2024).

Cross-currency interest rate swaps

As at March 31, 2025, the aggregate notional amount of cross-currency interest rate swaps entered into was US\$975 million to hedge the US-to-Canadian dollar currency fluctuations on US dollar-denominated debts maturing on March 1, 2026 and July 15, 2028, for an aggregate principal amount of \$1,401 million with a weighted average fixed annual interest rate of 3.33%.

These cross-currency interest rate swaps were designated as qualifying hedging instruments and were accounted for as cash flow hedges, with their critical terms corresponding to the related US dollar-denominated debts.

For the three months ended March 31, 2025, the cumulative changes in fair values of these cross-currency interest rate swaps recorded in Accumulated other comprehensive loss in derivative instruments resulted in a gain of \$1 million. For the three months ended March 31, 2025, the amounts amortized from Accumulated other comprehensive loss to Other income related to foreign currency exposure and Interest expense were gains of \$2 million and \$1 million, respectively, in the same period that the carrying values of the two US dollar-denominated debts were remeasured to Canadian dollars and the interest expense was recognized.

The cash flows related to these cross-currency interest rate swaps that pertain to the periodic interest settlements will be classified as operating activities and the cash flows that pertain to the principal balance will be classified as financing activities.

As at March 31, 2025, the fair value of outstanding cross-currency interest rate swaps included in Other current assets was \$1 million.

MANAGEMENT'S DISCUSSION AND ANALYSIS

Fair value of financial instruments

As at March 31, 2025, the Company's debt, excluding finance leases, had a carrying amount of \$20,785 million (\$20,887 million as at December 31, 2024) and a fair value of \$19,679 million (\$19,688 million as at December 31, 2024). The carrying amount of debt excluding finance leases exceeded the fair value due to market rates being higher than the stated coupon rates.

Additional information relating to financial instruments is provided in *Note 11 – Financial instruments* to the Company's March 31, 2025 Interim Consolidated Financial Statements.

Recent accounting pronouncements

The following recent Accounting Standards Updates (ASU) issued by the Financial Accounting Standards Board (FASB) have an effective date after December 31, 2024 and have not been adopted by the Company:

ASU 2024-03 – Disaggregation of Income Statement Expenses (Subtopic 220-40)

This ASU aims to provide stakeholders a clearer understanding of an entity's expenses and enhance their ability to assess performance, forecast expenses and evaluate the entity's potential for future cash flows. The ASU amends the rules on income statement expense disclosures and requires public business entities to disaggregate and disclose, in tabular format in the notes to financial statements, specified categories of expenses contained within certain income statement expense line items; to integrate certain amounts that were already required to be disclosed under current GAAP with the new disaggregation requirements and to qualitatively disclose descriptions of the amounts remaining that were not separately disaggregated. The ASU also requires public business entities to disclose the total amount of selling expenses and, in annual reporting periods, an entity's definition of those selling expenses. This ASU does not change or remove the current disclosure requirements of expense line items on the face of the Consolidated Statements of Income.

The amendments in this ASU are effective for annual reporting periods beginning after December 15, 2026, and interim reporting periods beginning after December 15, 2027. Early adoption is permitted. The amendments in this ASU should be applied either prospectively to Consolidated Financial Statements issued for reporting periods following the effective date, or retrospectively to any or all prior periods presented in the Consolidated Financial Statements.

The Company is evaluating the effects that the adoption of the ASU will have on its Consolidated Financial Statements disclosures.

ASU 2023-09 Income Taxes (Topic 740): Improvements to income tax disclosures

The ASU amends the rules on income tax disclosures by modifying or eliminating certain existing income tax disclosure requirements in addition to establishing new requirements. The amendments address investor requests for more transparency about income taxes, including jurisdictional information, by requiring consistent categories and greater disaggregation of information. The ASU's two primary amendments relate to the rate reconciliation and income taxes paid annual disclosures.

Reconciling items presented in the rate reconciliation will be in dollar amounts and percentages, and will be disaggregated into specified categories with certain reconciling items further broken out by nature and/or jurisdiction using a 5% threshold of domestic federal taxes. Income taxes paid will be disaggregated between federal, provincial/territorial, and foreign taxing jurisdictions using a 5% threshold of total income taxes paid net of refunds received.

The ASU is effective for annual periods beginning after December 15, 2024.

The adoption of the ASU will have an impact on the Company's Consolidated Financial Statements disclosures. The required disclosure changes will be reflected in the Company's Consolidated Financial Statements when the ASU is adopted. As the Company will not early adopt the ASU, the required disclosure changes will be reflected in the Company's 2025 Annual Consolidated Financial Statements. The Company is currently evaluating whether to apply the amendments prospectively or retrospectively.

Other recently issued ASUs required to be applied on or after March 31, 2025 have been evaluated by the Company and are not expected to have a significant impact on the Company's Consolidated Financial Statements.

MANAGEMENT'S DISCUSSION AND ANALYSIS

Critical accounting estimates

The preparation of financial statements in accordance with GAAP requires management to make estimates, judgments and assumptions that affect the reported amounts of revenues, expenses, assets and liabilities, and the disclosure of contingent assets and liabilities at the date of the financial statements. On an ongoing basis, management reviews its estimates based upon available information. Actual results could differ from these estimates. The Company's policies for income taxes, capital expenditures and depreciation and pensions and other postretirement benefits require management's more significant judgments and estimates in the preparation of the Company's consolidated financial statements and, as such, are considered to be critical. Reference is made to the section entitled *Critical accounting estimates* of the Company's 2024 Annual MD&A for a detailed description of the Company's critical accounting estimates. There have not been any material changes to these estimates in the first quarter of 2025.

Management discusses the development and selection of the Company's critical accounting policies, including the underlying estimates and assumptions, with the Audit, Finance and Risk Committee of the Company's Board of Directors. The Audit, Finance and Risk Committee has reviewed the Company's related disclosures.

Business risks

In the normal course of business, the Company is exposed to various business risks and uncertainties that can have an effect on the Company's results of operations, financial position, or liquidity. While some exposures may be reduced by the Company's risk management strategies, many risks are driven by external factors beyond the Company's control or are of a nature which cannot be eliminated.

Reference is made to the section entitled *Business risks* of the Company's 2024 Annual MD&A for a detailed description of such key areas of business risks and uncertainties with respect to: Competition, Environmental matters, Personal injury and other claims, Labor negotiations, Economic conditions, Regulation, Pandemic risk, Pension funding volatility, Reliance on technology and related cybersecurity risk, Trade restrictions, Terrorism and international conflicts, Customer credit risk, Liquidity, Supplier concentration, Availability of qualified personnel, Fuel costs and supply disruptions, Foreign exchange, Interest rates, Transportation network disruptions, Severe weather, Climate change and Reputation, which is incorporated herein by reference. Additional risks and uncertainties not currently known to management, or that may currently not be considered material by management, could nevertheless also have an adverse effect on the Company's business.

The following are material changes to the risks described in the Company's 2024 Annual MD&A.

Trade restrictions

The recent imposition of tariffs by the U.S. administration on imports from Canada and other countries combined with retaliatory tariffs by some countries, including Canada, on U.S. exports, present significant risks to global trade. These various tariffs and trade barriers could escalate costs for materials and fuel, adversely impact the demand for one or more commodities that we transport, disrupt supply chains and negatively affect demand for rail services. These tariffs and barriers, and any additional future trade actions taken by the U.S. and other countries in response, including the further escalation or implementation of tariffs or quotas or changes to certain trade agreements, could materially adversely impact the North American and global economies.

While it is still too early to fully assess the potential outcome of these global tariffs and ongoing trade actions taken by various governments and agencies globally, such actions could materially adversely affect demand for rail services and could materially and negatively impact the Company's financial results.

MANAGEMENT'S DISCUSSION AND ANALYSIS

Controls and procedures

The Company's Chief Executive Officer and its Chief Financial Officer, after evaluating the effectiveness of the Company's disclosure controls and procedures (as defined in *Exchange Act* Rules 13a-15(e) and 15d-15(e)) as of March 31, 2025, have concluded that the Company's disclosure controls and procedures were effective.

The Company is implementing and upgrading its Enterprise Resource Planning (ERP) system to SAP S/4HANA. The legacy ERP system will be phased out as the Company fully transitions to the new system. As the phased implementation continues, the Company will change its processes and procedures, which in turn, could result in changes to its internal control over financial reporting. As such changes occur, the Company will evaluate quarterly whether such changes materially affect its internal control over financial reporting. There were no changes in the Company's internal control over financial reporting (as defined in *Exchange Act* Rules 13a-15(f) and 15d-15(f)) that occurred during the three months ended March 31, 2025, that have materially affected, or are reasonably likely to materially affect, the Company's internal control over financial reporting.
